

SCW Wood club Training Sharpening Demonstration

Instructor: Bob Simmons

Date: Thursday February 16

Time: 3:00PM-5:00PM

Location: at The big workbench near the library

Bob Simmons, a wood club training instructor, will demonstrate the process of “honing” a chisel or plane blade (flat blade). Bob will demonstrate using an angle guide and a sequence of wet sandpaper from 1200 to 2000 grit to produce a very sharp and usable hand chisel or plane blade.

This demonstration is the introduction for a training class that will be scheduled for membership of the SCW Wood Club. Following the demonstration, members will be able to sign up on Signup Genius for Bob’s instructor led hands-on class. Participants in the hands-on class will be expected to provide their own plane blade or chisel for the exercise.
